

Career Essentials ... Valuable Class with Job Shadows

Juniors in the Career Essentials class have been learning about Nebraska Career Readiness Skills, which are expectations in today's workforce. Between classroom curriculum and on-site job shadowing experiences, students are gaining valuable skills for their futures.

Here's what students are saying about the class and their job shadows:

Liz Traudt – “I would highly recommend taking this class even if you know what you want to go into. When you job shadow, you may dislike the career you thought you'd love, or you may love another career way more. Before this class, I had no clue what I wanted to do in my future, but now I know exactly what I want to do.”

Tyler Earnest – “From being in this class, I believe that I have narrowed down the career I want to pursue in the future. I have also learned the skills and traits that help the workplace work smoothly and effectively. Also, I learned how to properly fill out a job application, resume, cover letter, and how to do well in a job interview.”

Lucas Kuhn – “The job shadows were very informative and eye-opening, as we got to see parts of our future that we did not know existed previously. Many of the job shadow opportunities helped show me what I was and was not interested in in a career.”
